

Cross Overs

Can Be Installed Above Ready To Eat Processing

Simple or complicated designs provide the ability to cross over lines and equipment or access spaces isolated by efficient factory layouts.

SSi works with your most demanding requirements to provide access and mobility within the facility.

- High traction tread and deck materials
- Designs range from sanitary ready-to-eat through washable utility area service
- All welded construction
- Meets all OSHA safety requirements
- Stair riser, ship ladder, or SSi ladder options
- SSi ladder allows people to keep their hands on the climbing rail at all times with no need to grab rungs
