

Equipment Installation

Highest Quality Fit and Function of Your Production Equipment

Stainless Specialists has the highest quality craftsmen available to ensure that the equipment and systems that we install perform up to the design specifications that you expect. Our multi-craft multi-disciplinary installation teams bring all of the skills necessary to ensure a successful installation and start-up includes project management, designers, millwrights, pipe fitters, sheet metal technicians, plumbers, and HVAC technicians.

- SSi has extensive experience at working in food manufacturing facilities alongside operating processes
- All SSi associates are continually trained in safety and food safety/factory GMP
- The SSi project team conducts immersion conferences with the client to develop an extensive understanding of your business and project objectives and expectations
- SSi has the expertise to handle large equipment and the smallest details that make a project a success

Stainless Specialists installs equipment from any manufacturer including complete processing and packaging systems, platforms & catwalks, conveyors, ovens, spiral freezers and cooling tunnels.

- SSi works with your engineering personnel, or your outside engineering team
- Meets your most demanding project schedule and needs
- Firm fixed pricing, design assist, or T&M basis
