

Foot Bath

Reliable Simple Protection for Sanitary Areas

Protect the sanitary processing areas from footwear contamination with foot baths at every entrance. Aggressive stainless steel MaxTred decking provides solid high traction footing in a wet and slippery area.

- Works with flooded sanitizer or foamed sanitizer
- Options include in-floor and above floor free standing designs for rapid installation
- Sizes available for all entrances and passageways
- Liquid level is maintained with a simple and reliable overflow drain
- Easy to disassemble for periodic cleaning and inspection
- Utilizes anti-slip MaxTred planking to provide solid footing surface with a long life in high traffic areas
