

MaxTred

Large raised traction grip cones in a staggered pattern reduces material accumulation on the MaxTred surface for a high traction footing surface with 1/4" traction grip cones on the nose.

MaxTred has been used in the food industry for over ten years in extreme conditions including those containing grease, water, dust/ ingredients and combinations of all of these.

The all stainless steel construction provides for strong, long lasting and cleanable walking surface.

- Approved for use in ready-to-eat facilities
- Wash-thru weld tabs are standard
- Crevice free for easy to clean corners
- Available as stair and riser assemblies
