

Platforms

- All sanitary welded design
- High traction stair tread and deck surfaces
- Materials can be specified by the customer
- Designed to eliminate water retaining surfaces
- Designed for sanitation and cleanability
- Make use of the area above factory floor
- Ladder access available where required
- Designed to fit the space available and the equipment to be included on, under or around the platform

Custom Designed Platforms That Fit Your Process

Designs cover a range of applications from packaging areas to full USDA/FDA wash down ready to eat areas, and meet all OSHA requirements.

When you need to move up off from the factory floor to increase capacity or access to your processes, Stainless Specialists can design, build, and install customized platforms to allow you to grow into the space above your existing processes.
